**CC Key:** There are two relevant Associate's degrees. The AS-Mechanical/Civil/Aero/Ind/MSE - MRP degree and the AS-T2. More info on back.

**R** = Required for the Associate of Science degree. The AS-T2 also requires completion of a minimum of 32 additional advisor-approved college level credits.

**S** = Specialization Course - Minimum of 4 courses for AS-MRP. Minimum of 32 college level credits for AS-T2

**University Key:** √ = Required for admission or certification to the department. For UW, √-app class must be completed by April 5. √-enr by Fall start at UW.

**G** = Graduation requirement for the Bachelor of Science at the university. These are freshman/sophomore level courses so take now, if possible.

**A** = Meets an additional requirement. The university requires the selection of additional classes from specific lists for the BS.

**P** = Provides preparation for junior level university coursework and/or for the FE/EIT exam, the first step to being licensed.

**Additional notes** \*The AS degree requires 15 credits of Humanities and Social Science. At least 5 credits must be a Humanities and 5 credits must be a Social Science. One class must meet the diversity requirement. See approved lists. Universities may have specific course Humanities/Social Science course requirements.

<sup>1</sup> Intro to Design, Materials Science, and Thermodynamics are not offered at CC. However, this presents no barrier to transfer as they are not admission requirements. The equivalent classes can be taken at the transfer institution if necessary. **For aerospace take Thermodynamics AA 260 offered in summer at UW before fall enrollment.**

<sup>2</sup> SMU requires English 102 instead of English 235. English 102 may be substituted for 235 in the AS degree.

<sup>3</sup> GU requires a literature-based writing class instead of English 235. Check with GU to see if CC's ENGL& 111 is acceptable. ENGL& 102 may be substituted for 235 in the AS degree.

<sup>4</sup> Engr 104 will be waived by WSU if student transfers with 60+ credits. Numerical Methods is preferred to computer programming. Electric Circuits must have lab.

<sup>5</sup>ENGR 203 is equivalent to SMU's GE 104

# Mechanical and Aeronautical/Astronautical Engineering Program Requirements

## Centralia College

Students should generally be working toward one of three associate's degrees: 1) the Associate of Science - Major Related Program for Mechanical/Civil (AS-MRP), 2) the Associate of Science- Track 2 (AS-T2), and/or 3) the Associate of Arts DTA (AA-DTA). The AS-MRP was developed on the state level to most closely mirror the coursework that a student would be taking at a university engineering program. In general, most Mechanical/Aero students should be working toward the AS-MRP. If you are a few courses shy of the MRP, talk to an engineering advisor; you may be eligible for an AS-T2. The AA-DTA degree is intended for students to complete their general education requirements and is usually a poor fit for engineering students since it does not allow them to take all of the required prerequisites. Some universities give specific benefits for one or more of these degrees. Although we advise transferring without a degree in some instances, transferring courses back to complete the degree is requested. CC funding is tied to associate's degree completion, so you help future students by finishing your degree. You may earn more than one degree from CC. CC strongly encourages economics courses for engineering students.

## University of Washington - Seattle

You must apply to both the university and the major. The Mechanical and Aero/Astro departments only admits students in fall quarter. The transfer student application deadline for the University of Washington (fall quarter start) is February 15. (There may be other deadlines for international students.) The application deadline for the department is April 5. Some classes must be completed before you apply (V-app). Some courses must be completed before you start in the fall (V-enr). University of Washington requires core requirements from high school. This applies even if high school was years ago! High school is considered to start in 9th grade. The core requirements are 4 years of English, 3 years of math, 3 years of social science, 2 years of foreign language, 2 years of lab science, and 0.5 years of art. If you did not complete these in high school, the requirements can be met through CC courses. In general, 1 year of high school class = 5 credits of college work. See the University of Washington website for more details.

## Washington State University - Pullman, Bremerton, Everett

In addition to the program at the main Pullman campus, WSU has junior/senior year programs at Bremerton and Everett. These are ABET accredited as part of the main campus. WSU Bremerton and Everett students must take all V classes, Engr& 204 and either Engr 203 (preferred) or a computer programming course with equivalency to WSU's Cpts 121 or 131. (Note: CC's ENGR 203 has equivalency for WSU's EE 221. ENGR&204 is in the process of becoming a formal equivalency for WSU's EE261/262. It has been accepted on an ad hoc basis in the past). WSU gives advantages to completing the AS-MRP degree. Individual departments have specific requirements, so while a social science may transfer, if you don't choose carefully, you may also have to take another class to meet the requirement. Choose the following courses: HIST& 128 (World Civ 3) and ECON& 202 (Macro). Chem& 161 and 162 will satisfy the chemistry requirement for ME only if the full year engineering physics sequence is completed at the community college. WSU requires a writing portfolio so save three samples of graded written work from CC. Download forms from the WSU website and ask your instructors to sign them. Do it as you are taking classes rather than having to go back and ask instructors to evaluate your work again. WSU is on the semester system rather than the quarter system. They require application to the university followed by certification into the program. See university website for important deadlines.

## Washington State University - TriCities

WSU-TriCities is separately ABET accredited. Choose the following courses: HIST& 128 (World Civ 3), and either ECON& 201 (Micro) or ECON& 202 (Macro). Chem& 161 and 162 will satisfy the chemistry requirement for ME only if the full year engineering physics sequence is completed at the community college. Although CC's ENGR 203 (Applied Numerical Methods) transfers to other WSU campuses as EE 221, this articulation is still in progress with WSU-TriCities. Talk to a WSU advisor.

## Washington State University - Vancouver

WSU-Vancouver is separately ABET accredited. In Mechanical Engineering, students can customize their study through four option areas: (1) Micro/nanotechnology; (2) Design and Manufacturing; (3) Mechatronics (robotics and automation); (4) Renewable Energy. Choose the following courses: HIST& 128 (World Civ 3), and either ECON& 201 (Micro) or ECON& 202 (Macro). Chem& 161 and 162 will satisfy the chemistry requirement for ME only if the full year engineering physics sequence is completed at the community college. ENGR 203 would transfer to WSU Vancouver as the equivalent course to MECH 251 Numerical Computing, a required course for the program.

## University of Washington - Bothell

UW-Bothell is separately ABET accredited. The ME program admits new students twice a year, for Autumn and Winter quarters.

## Eastern Washington University

EWU has engineering programs, as well as a number of technology programs. Acceptance to the major is automatic once accepted to the University. EWU gives advantages to completing the AS degree. Students who complete the AS do not need to take 15 credits of the required 25 credits in the General Education Core requirements. All courses designated as Humanities and Social Sciences by CC will be accepted as Humanities and Social Sciences by EWU, regardless of individual course transferability. No biological sciences, or macro/micro economics courses are required for graduation.

## Seattle University

Seattle University is a private Catholic (Jesuit) university and the Mechanical Engineering program is ABET accredited since 1962. Transfer student priority application deadline is March 1 for Fall Quarter and scholarships are available. Students can begin their studies at Seattle U also in winter and spring quarters. Obtaining an AS-T2 degree is beneficial since it may reduce the number of CORE courses required for graduation to as few as 3. At least one course each in humanities, social science, and doing art (or creative writing) is highly recommended to maximize the benefit.

## Saint Martin's University

SMU is a private Catholic (Benedictine) university. SMU recommends completion of the AA-DTA while simultaneously working on the AS-MRP or AS-T2 so that General Education requirements are met as well as department requirements. You may apply courses to both degrees, but will have to take 30 additional credits to complete both. Take ENGL& 102 instead of ENGL& 235. You may substitute 102 for 235 in the AS degree. Many classes require minimum of C for transfer.

## Seattle Pacific University

SPU is a private Christian university. If you have earned, prior to matriculation at SPU, an AS-T2, you will be required to take only two of the three required University Foundations courses, UFDN 3001 Christian Scriptures and UFDN 3100 Christian Theology. SPU's BSME degree is new (2018-19), it is not yet ABET accredited; however, the BSME degree requirements are identical to SPU's General Engineering degree with the Mechanical Concentration, which is ABET accredited. So, SPU students can double major in both the BSME and the GEGR-ME to get the BSME, which is not yet accredited, and simultaneously earn the GEGR-ME, which is ABET accredited.

## Gonzaga University

Gonzaga is a private Catholic (Jesuit) university. A literature-based english class is preferred over Technical Writing, check with GU for options. Take PHIL& 101 while at CC. One Java (CS& 141) class is accepted.

**It is the student's responsibility to check university websites and meet with university advisors to ensure the accuracy of advising information.**
